

VALENTINA SACCONI

Education

UNIVERSIDAD TECNOLÓGICA NACIONAL – FACULTAD REGIONAL TUCUMÁN (UTN-FRT)

2019 - Present

Major: Information Systems Engineering

Skills

- SQL (SQL Server, MySQL)
- Python (Pandas, NumPy, Matplotlib)
- Microsoft Power BI
- Tableau
- Excel (VLookup, Conditional Formatting, Pivot Tables)

Projects

DATA CLEANING PROJECT – SQL

2024

- Cleaned and standardized raw housing data from the “Nashville Housing Data” dataset for improved analysis.
- Standardized date formats, managed missing values, split concatenated fields into multiple columns.
- Identified and removed duplicate entries to enhance dataset reliability.

DATA EXPLORATION PROJECT – SQL

2024

- Analyzed COVID-19 datasets, merging data with JOIN operations and using aggregate functions to identify trends.
- Employed SQL functions to compute cumulative vaccination counts and track progress over time.
- Used CTEs and temporary tables to organize intermediate data and calculate vaccination percentages per country.
- Created SQL views to store processed data, enabling efficient reuse for future visualizations and reporting.

POWER BI PROJECT

2024

- Created a dashboard based on a survey of IT professionals.
- Transformed and processed data by using DAX (Data Analysis Expressions) and Power Query to ensure data completeness.
- Created dynamic visualizations, including bar charts, tree maps, cards, pie and donut charts.

AUTOMATING PROJECT – PYTHON

2024

- Developed a **Python** application to extract cryptocurrency data from the CoinMarketCap API.
- Normalized JSON data into **Pandas** DataFrames for analysis and added timestamps for tracking.
- Automated data collection by scheduling API calls every minute to aggregate cryptocurrency metrics over time.
- Analyzed and visualized percentage changes in cryptocurrency values using **Seaborn**, providing insights into market trends.

TABLEAU PROJECT

2024

- Created a dashboard with **Tableau** based on an “AirBnB” dataset.
- Combined data using joins to merge multiple tables, enabling the integration of data for use in visualizations.
- Created dynamic visualizations, including bar charts, maps and line graphs.

EXCEL PROJECT

2024

- Utilized **Excel** for data cleaning a “bike buyers” dataset to ensure data accuracy and consistency.
- Created pivot tables to summarize and analyze data effectively.
- Developed an interactive dashboard for data visualization.
